

Math, Science Health and Fitness Academy

School Leadership Team (SLT) Charter

The Purpose of the SLT is to Monitor the implementation of the Learning Plan and suggest modifications year-to-year. In the Math, Science, Health and Fitness Academy at Todd Beamer High School, the SLT will also contribute to the formulation of the academy, making it a unique, rigorous and healthy community in which students learn and grow. To meet those ends, the SLT members will share thoughts, be conduits of information both to and from their representative groups and offer feedback and suggestions to make the MSHF Academy a strong and vibrant small-school learning environment.

Membership will be comprised to the best of our ability of equal representation by parents, staff, students, and community members. Effort will also be made towards balancing grade level, gender and ethnic representation. The total number of the group will not exceed fifteen.

The selection of members will remain open to all contributors willing to participate in a committed and open-minded manner. If at some time in the future, interested candidates exceed the fifteen-person limit, existing members will utilize an interview process whose intent is to evaluate commitment to academy-wide issues and problem solving. At no time will selections be used to exclude any particular group of people.

Length of membership will be two years. Each year, one-half of the membership will be open to new candidates. Rotating membership will expand the numbers of people involved in the academy's leadership. The staggered memberships will insure a constant influx of new ideas and points of view while at the same time providing for continuity and insuring that all times the membership will include participants knowledgeable about the team's projects.
